

FYS: Making Color

Search and Obtain Assignment (1-2 pages, worth 30 points, due Mon, Nov 20th)

In this assignment, you will essentially conduct the same kind of search as you did for your group projects. Find and physically obtain one book that is relevant to your final research topic.

Write a 1-2 page report that proves the relevance of the book to your topic. Refer back to the final paper rubric in order to show how this source will help address some requirements of the assignment, as well as where it fails to address other elements that will need to be supported with other sources. Cite your references in Chicago Style and include a Bibliography.
